Profile checklist before ordering

Tick each item only after checking it. Use the blank lines for your own notes.

Profile / post: _____

Review date: _____

- [ ] Choose Instagram or TikTok and the exact username.
- [ ] Check account privacy in your own app.
- [ ] Check each post selected for likes or views.
- [ ] Refresh the profile on our site and compare the loaded content.
- [ ] Review the target and allocation before payment.

Keep the account and selected posts public, retain the username and do not delete the selected content. Renaming or deleting changes the target associated with the order; it does not redirect an existing order to a different profile.
